

1N3305  
thru  
1N3350

# 50 WATT SILICON ZENER DIODES

Available in Voltages from 6.8 V thru 200 V

**FEATURES:**

- ZENER VOLTAGE 6.8 TO 200 V
- LOW ZENER IMPEDANCE
- HIGHLY RELIABLE AND RUGGED
- HERMETICALLY SEALED
- MATTE TIN PLATED
- CUSTOM DESIGNS AVAILABLE ~ CONSULT FACTORY

**POLARITY:** Standard polarity anode to case. Reverse polarity (cathode to case) indicated by suffix R. (EX. 1N3305RB).

DO-5

PACKAGE OUTLINE

**MAXIMUM RATINGS:**

Junction and Storage Temperatures	-65°C to +175°C
DC Power Dissipation:	50 Watts
Power Derating:	0.5 W/° above 75°C
Forward Voltage @ 10 A:	1.5 Volts Max

Power Derating Curve

Typical Zener Impedance vs. Zener Current

# NEW ENGLAND SEMICONDUCTOR

<sup>^</sup>Suffix 'A' indicates ± 10% tolerance.

\*\* $V_{R2}$  - test voltage for  $I_R$

<sup>^</sup>Suffix 'B' indicates ± 5% tolerance.

\* $V_{R1}$  - test voltage for  $I_R$

<sup>^</sup>No suffix indicates ± 20% tolerance.

No  $I_R$  specified for this device
