

Features

- · RoHS lead solder exemption compliant
- Industry standard half-brick
- Low-cost design
- 100 °C baseplate operation
- Open-frame packaging
- 24 V and 48 V input versions
- Input Pi filter
- Optional enable logic
- 1500 V isolation

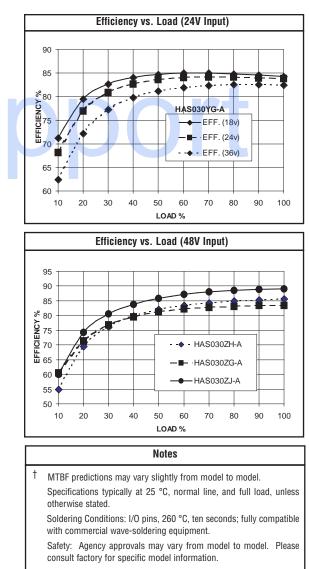

Description

HAS dc-dc converters provide up to 30 watts of output power in an industry-standard package and footprint. With a maximum case temperature of 100 °C, the HAS is well suited for the most demanding telecom, networking, and industrial applications. The HAS features 1500 VDC isolation, short circuit, and overtemperature protection, as well as six-sided shielding. The HAS series is available with optional enable and voltage trim pins. Please see the HAD Series for dual-output applications.

NOTES:

* Maximum input current at minimum input voltage, maximum rated output power.

** At nominal V_{in}, rated output.

Model numbers highlighted in yellow or shaded are not recommended for new designs.
