

1500 WATT SILICON BIPOLAR TRANSIENT SUPPRESSOR DIODES

The NES 1N6036A to 1N6072A series of Bipolar Silicon Voltage Transient Suppressor diodes are designed for use in AC circuits where large voltage transients can permanently damage sensitive components. Because of their high surge capability and inherent fast clamping voltage response time (5×10^{-9} seconds), these devices can also be useful in the protection Integrated Circuits, Mosfets, Hybrids and other voltage sensitive semiconductors and components.
