## High voltage and switching NPN transistors

---

## Application notes

### APPLICATION INFORMATION

Application information for high voltage and switching NPN power transistors, and other Philips Semiconductors power products, is published in the *Power Semiconductors Applications Handbook*. The ordering code for this publication is: 9398 652 85011.

The *Applications Handbook* contains information-processing the theory of power transistors in typical applications such as SMPS and TV deflection circuits. Examples are included to support the theory.
