

OptoMOS® Solid State Switches

DESCRIPTION

Single or dual output OptoMOS® solid state switches are part of CP Clare's growing family of solid state switching devices (Loads up to 400 volts AC or DC and currents up to 1 Amp). As replacements for form "A"/"B"/"C" or dual form "A"/"B" electromechanical relays, these devices use a proprietary photovoltaic circuit and MOSFET switching elements for reliable bounce-free switching operation. Complimentary output devices require no auxillary supply current to maintain an on-state condition.

FEATURES

- Small 6 and 8 pin DIP packages
- 2mW drive power (logic compatible)
- No moving parts
- Loads up to 400V AC/DC and 1 Amp (1P) or 170mA (2P)
- Expected life > 15 billion operations
- Arc-Free with no snubbing circuits
- 3750V_{RMS} input/output isolation
- FCC compatible
- No EMI/RFI generation
- Machine insertable, wave solderable
- Surface Mount and Tape & Reel version available
- UL recognized file #: E76270
- CSA certified file #: LR 43630-10
- VDE compatible
- BSI certified to:
 - BS EN 60950: 1992 (BS7002: 1992) Certificate #: 7344
 - BS EN 41003: 1993 Certificate #: 7344

APPLICATIONS

- Telecommunications
 - Telecom switching
 - Tip/Ring circuits
 - Modem switching (laptop, notebook, pocket size)
 - Hookswitch
 - Dial pulsing
 - Ground start
 - Ringer injection
- Instrumentation
 - Multiplexers
 - Data acquisition
 - Electronic switching
 - I/O subsystems
 - Meters (watt-hour, water, gas)
 - Medical equipment
- Security
- Aerospace
- Industrial controls

RATINGS (@ 25 C)

Parameter	Min	Typ	Max	Units
